wav and aiff files are also included. File extensions include:- 24bit- 16bit- 8bit- 96kbps- 192kbps- 48kbps- 24kbps- 96kbps- 48kbps- 24kbps 20. The application has been re-written to take advantage of the .NET Framework 2.0. Because .NET and .NET are not directly supported by the emulator, a custom control, the XSpand20WinControl, is included. The XSpand20WinControl allows the developer to bind Windows controls to a Windows Forms developer controls. For instance, the TableViewCellEditor is bound to the TableViewCell control so that its "Delete" button will function normally. (XSpand20WinControl.cs) The application also includes a custom drawing engine. This is used to allow the developer to redraw controls, and to create custom shapes. The ShapeFactory class allows the developer to create new shapes (for instance, a Circle or a Rectangle) and to draw them on the screen. 26. The JavaSpand20.jar file has been updated to the latest version of the Java and JavaSpandAPI API's. The JavaSpandAPI is the main API that has been used to create the application. A tiny part of the API has been modified so that the functions of the last 18 months are available. At the same time, the application has been re-written to use the latest API. The changes to the API's are described in the ChangeLog file. 30. New Features and Enhancements: The following sections describe changes to the SPRXCS, SPRSXCS, and SPXCS files. The "Comments" column of the SPRXCS, SPRSXCS, and SPXCS files can now be set. The Comments property is part of the PROPERTY_FILES collection of properties. By default, the comments are initialized to "". The following columns have been added to the SPRXCS, SPRSXCS, and SPXCS files: Title, Description, Category, Date, Checkin, User, Comment. 82157476af
